Artifact 1: Comprehensive Defect / Bug Report

Defect ID:	BUG-2026-089	Severity:	HIGH
Module:	Checkout & Payment Gateway	Priority:	HIGH
Environment:	Staging (Chrome v128 / macOS)	Reported By:	Senior SQA Engineer

Summary:

Application returns HTTP 500 Internal Server Error when applying a valid promo code on checkout with order total exceeding \$100.

Steps to Reproduce:

- Navigate to application storefront and log in with registered buyer credentials.
- Add items totaling over \$100 to the shopping cart.
- Proceed to the Checkout page.
- Enter promo code DISCOUNT20 into the Promo Code input field.
- Click the "Apply Code" button.

Expected vs. Actual Result:

- Expected Result:** Promo code is verified, 20% discount is deducted from order total, and order summary reflects updated pricing dynamically.
- Actual Result:** Application hangs for 4 seconds, displays modal error *"An unexpected error occurred"*, and network tab logs HTTP status 500 Internal Server Error.

API / Server Log Snippet:

```
POST /api/v1/checkout/apply-coupon HTTP/1.1
Host: staging-api.example.com
Response Status: 500 Internal Server Error
Payload: {"code": "DISCOUNT20", "cart_id": "89412"}
Response Body: {"error": "NullPointerException: Cannot calculate discount on null currency object"}
```

Artifact 2: Test Case Execution Suite

TC ID	Test Scenario	Expected Result	Execution Type	Status
TC_AUTH_01	Verify user login with valid credentials	User authenticated successfully and redirected to dashboard	Playwright (Auto)	PASS
TC_AUTH_02	Verify user login with invalid password	System displays clear error: "Invalid email or password"	Manual	PASS
TC_CART_05				FAIL

TC ID	Test Scenario	Expected Result	Execution Type	Status
TC_API_12	Validate discount code application on cart	Total price updates dynamically with active discount applied	Playwright (Auto)	
	Validate GET /api/v1/products schema response	Returns HTTP 200 OK with required JSON properties (id, price, stock)	Postman (API)	PASS
TC_PERF_01	Load test authentication endpoint with 100 concurrent users	Response time remains < 500ms with 0% error rate	JMeter (Load)	PASS
